Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Ishiguro et al. (US Pub. No. 2006/0056624).

3. Consider claims 1 and 5. Ishiguro et al. teaches an authentication method used in a digital versatile disk (DVD) system for generating an authentication code according to an inquiring code so as to authenticate a playback device, the inquiring code comprising a first portion and a second portion both with at least one bit; the method comprising: generating a first sub-authentication code according to the first portion of the inquiring code; generating a second sub-authentication code according to the second portion of the inquiring code; and combining the first sub-authentication code and the second sub-authentication code to form the authentication code (pg. 5, paragraphs 0082-0087; figs. 7A, 7B) (64 bits are combination of the two sub-authentication codes, first sub-authentication code comprising 1-63 bits, second sub-authentication code comprising the remaining bits).

Allowable Subject Matter

4. Claims 2-4 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
